Jiu Axl R. Tabilla

Full-Stack Software Engineer | Python · Django · Laravel · Vue.js

Bukidnon, Philippines | +63 967 165 5604 | axldamnaxl@gmail.com | Open to remote work (flexible timezone overlap)

Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full-Stack Software Engineer specializing in Python, Django, and REST API development, with 2+ years of professional experience building and maintaining production SaaS applications. Experienced in backend architecture, relational database design, frontend integration, and cloud infrastructure using AWS and Azure DevOps. Developed solutions across compliance automation, AWS Marketplace enablement, and two-sided marketplaces for an Ontario-based software company. Progressed from part-time Product Developer to full-time Product Engineer within 13 months. Magna Cum Laude graduate in Information Technology; DIGIMC 2025 and Innova Hackathon champion.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, PHP, Dart
Backend Development: Django, Laravel, Express.js, REST API Development, API Integration
Frontend Development: Vue.js, React, Next.js, HTML, CSS
Mobile Development: Flutter
Databases: PostgreSQL, MySQL, SQLite, Firebase, Supabase, SQL
Cloud & DevOps: AWS (Lightsail, RDS, IAM), Azure DevOps (issue tracking, workflows), Git, GitHub
Testing & Quality: Manual and API/Integration Testing, Debugging, Issue Triage, Code Review
Architecture & Practices: Full-Stack Development, Backend Architecture, Database Design, Data Engineering
Additional: AI-Assisted Development (Claude, ChatGPT), Figma, UI/UX Prototyping

PROFESSIONAL EXPERIENCE

Product Engineer (Full-time) | Buzzerboy Inc, Ontario, Canada (Remote) Aug 2025 – Nov 2026

- Led full-stack development of production SaaS applications using Python, Django, Laravel, Vue.js, and relational databases; promoted from part-time Product Developer to full-time Product Engineer within 13 months.
- Led development of StraightLine, TechRepNetwork, and Visage; core developer on SocBridge and IronFort.
- Owned backend architecture and feature delivery for StraightLine, building workflows that guide SaaS companies through AWS Partner status, Foundational Technical Review (FTR) readiness, and AWS Marketplace launch.
- Developed Django backend modules for compliance products: SocBridge (SOC 2 policies, employee training, attestations) and IronFort (continuous, automated compliance replacing manual spreadsheets and annual audits), serving Canadian government, healthcare, and SaaS teams.
- Designed relational database models and REST API endpoints, and built data-engineering workflows supporting compliance monitoring and reporting.
- Built two-sided marketplace features for TechRepNetwork (sales reps and tech companies, commission-based) and Visage (creators and startups).
- Tested APIs and application flows, investigated issues, and validated frontend and backend functionality before deployment; worked in Git, GitHub, and Azure DevOps workflows.
- Deployed and maintained applications on AWS (Lightsail, RDS, IAM).
- Used AI-assisted workflows daily (Claude for agentic development, ChatGPT for research) to accelerate delivery, debugging, and code review.

Affiliate Developer (Concurrent) | withKM, Bukidnon-based software startup Jun 2025 – Dec 2025

- Collaborated on client software solutions alongside my full-time role; gave product feedback to other teams and represented withKM at Bukfest (hosted by DevCon, Valencia City).

Product Developer (Part-time) | Buzzerboy Inc, Ontario, Canada (Remote) Jul 2024 – Jul 2025

- Designed UI screens and prototypes from the company's component library and implemented them in the frontend.
- Ran quality assurance: tested applications, logged and triaged issues in Azure, and fixed frontend bugs.
- Created and managed website content; took on full-stack and data-engineering work as scope grew.

Flutter Developer | Freelance (Self-employed) Jun 2024 – Dec 2024

- Built a cross-platform consultation app from scratch with Flutter.
- Developed a cross-platform ice-detection app integrated with a machine-learning model, in a team of three.

Full-Stack Developer | Freelance (Self-employed) Jan 2024 – May 2024

- Built an interactive laboratory learning website in a team, covering the React frontend and the Express.js backend.
- Designed and implemented the RESTful APIs and database design behind the application.

SELECTED PROJECTS

- **StraightLine** – Helps SaaS companies become AWS Partners and sell on AWS Marketplace. *Role: Lead Full-Stack Django Developer.* Django backend, FTR readiness and marketplace launch workflows.
- **IronFort** – Continuous, automated compliance platform replacing manual spreadsheets and annual audits. *Role: Full-Stack Django Developer and Data Engineer.* Compliance automation, data workflows, backend architecture.
- **SocBridge** – End-to-end SOC 2 platform covering policies, employee training and attestations. *Role: Full-Stack Developer.* Django/Laravel backend modules.
- **TechRepNetwork** – Marketplace connecting independent sales reps with high-growth tech companies on commission. *Role: Main Full-Stack Developer.* Marketplace architecture, APIs, business workflows.
- **Visage** – Marketplace connecting creators with startups that need authentic short-form video. *Role: Main Full-Stack Developer.* Creator marketplace, frontend and backend.
- **LINNKS** – Data-mapping and repository platform for organizations; also my capstone Knowledge Management System with mapping, built for NOMCAARRD, defended at Central Mindanao University and later presented to NOMCAARRD affiliates. *Role: Frontend Developer (Vue.js), API integration and UI design.*
- **Virtual Class** – Interactive virtual lab for plant taxonomy and ecology. *Role: Backend Developer and Data Engineer.* Contributed to UI/UX.
- **SellYoShirt** – Mobile inventory and sales tracker for new garment resellers. *Role: Sole developer.* Independent product development, inventory and sales management.

EDUCATION

BS Information Technology, Major in Software Development Aug 2021 – Jul 2025

Central Mindanao University, Musuan, Bukidnon | Magna Cum Laude; consistent college scholar and honor student since freshman year

AWARDS, RESEARCH & SPEAKING

- **Champion, Reverse Pitching Competition (Professional Category), DIGIMC 2025** (Oct 2025) – Pitched GeoSense, an AI-powered GIS system for tracking hazards and analyzing geospatial data.
- **Champion, Innova Hackathon, Valencia, Bukidnon** (Jul 2024) – Project manager and UI designer for FarmAid, a farm-to-table mobile app.
- **2nd Place, HABI Workshop (Agriculture), 2025 National Innovation Day** (Apr 2025) – Three-day innovation workshop, Quezon City.
- **Co-author, CyberSciTech 2025 (Regular Paper):** KahibawHub: Blockchain-Integrated Mobile Platform for Trusted Educational Content Sharing – designed and built the mobile app.
- **Resource Speaker, CISC OJT Pre-Deployment Seminar, CMU** (2026) – Client-side frameworks and API integration; live Vue.js + Laravel API demo.
- **Resource Person, NOMCAARRD Knowledge Management Training** (Aug 2025) – Presented the capstone system to NOMCAARRD affiliates.

UI/UX DESIGN PROJECTS (FIGMA)

- **Sheesh** – Full mobile UI for a shoe cleaning and repair platform, focused on simple booking flows.
- **LINNKS** – Interface for a data-mapping and repository platform, then built as frontend developer in Vue.js, taking one product from Figma to production.
- **Payroll System** – Payroll-management screens built from reusable design-system components for consistent layouts.
- **EcoTrail** – Travel landing page designed and shipped in two hours as a timed internship challenge.
- **FarmAid** – Mobile app UI giving farmers access to agricultural resources and experts; concept won the Innova Hackathon.
- **KahibawHub** – App screens designed in two days by adapting components from earlier projects.
